About Us

Flowlines is established with a clear purpose of meeting ever-growing requirements in the field of oil & Gas and Infrastructure Sectors. We are spearheaded by a team of dynamic professionals with over fifteen years of experience in sales, marketing, project design, specification, procurement, international logistics, and installation and after-sales. Our purpose is to deliver long-range economic benefits to customers by offering quality products that meet the standards and requirements. Striving for excellence is in our genes and keeping that mantra in mind through every step.

VISION

By holding up the core values of trust, excellence, innovation, and sustainability, we aim to build a progressive and customer-centric company. We value and rely on smart working individuals who can produce innovative results that will uplift us and our stakeholders. With our absolute commitment to the Products and Services, Quality, and Value, we shall set standards in the industry, making us a trusted & reliable partner for our clients. We believe that our continued success is built upon our core values

MISSION

Our business practices and processes are designed to achieve quality and economic results that exceed the expectations of our stakeholders. We deeply believe in collaborating with customers to study and understand their needs to produce world-class solutions from our trusted partners across the globe

MANUFACTURING UNIT - B3 A14 05 GWC, AL WUKAIR LOGISTIC PARK

OWN PRODUCTS

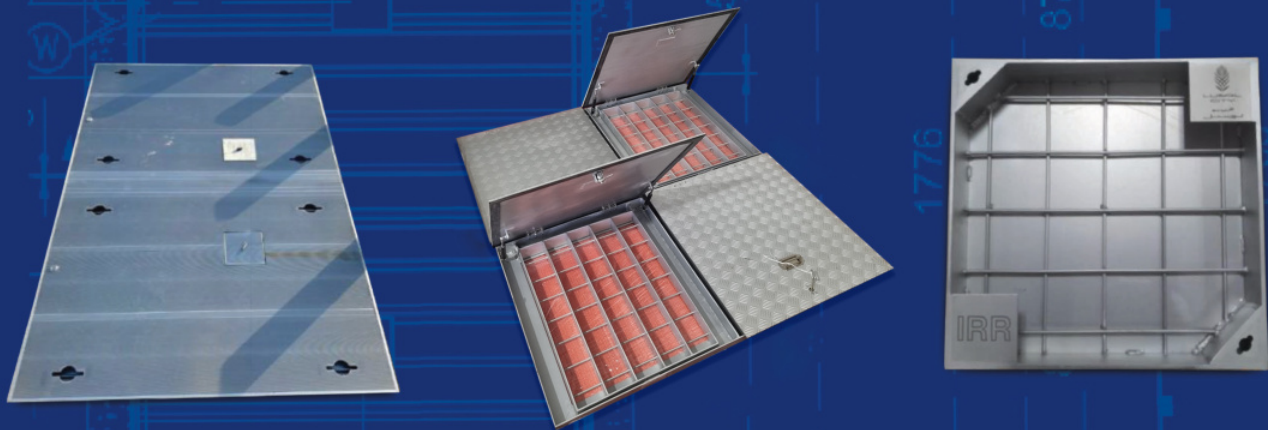

ACCESS COVERS IN ALUMINUM AND STEEL

Aluminum and Steel Access Covers are extensively used in areas that require regular and restricted access mainly in Infrastructure and Industrial projects. Aluminum alloy access cover platforms are fabricated out of composite section made of aluminum alloy 6063-T6 which has high tensile strength and excellent corrosion resistance properties. Load carrying capacity suitable for 750 kg./sq.mtr. (7.5 KN/M2). If required by the client higher grade alloy such as 6082 can be proposed.

Available Variants

- Type of Cover : Solid Top or Recessed Types
- Cover Top Profile : Serrated or Checker Plate
- Load class : Following standards are FATCA and other local specifications 7.5 KN/m² , 10 KN/m² etc)
- Mode of Opening : Removable Type, Hinged Type with hydraulic lift assist & Sliding type
- Orientation of Installation : Floor Type (for underground Chambers & Instruments) and Wall Type (on Vertical Walls)
- Material Grades : Aluminium 6063/6082 and Steel Grades S275/SS316/SS304

Gratings & Access Systems

FLOWLINES is the premier supplier of Gratings & Access Systems to key Oil & Gas, utilities, highways, civil engineering, construction, and Industrial companies

- Floor Gratings are supplied in Mild Steel & SS grades. Special Coating is available in HDG, polyurethane, and epoxy as required for the client.
- Electro forged gratings with twisted crossbar come in standard Mesh Sizes.

DETECTABLE WARNING TAPES

We offer Underground Detectable tape for buried Pipes lines and other Utilities. Underground Detectable Tape is buried directly above utility lines and it warns workers to stop digging before accidentally digging into the underground lines. When used correctly, the underground detectable tape can be detected using a low voltage metal detector thus mitigating the risk of inaccurate or dangerous digging around electrical, gas, water, communication, or oil lines.

As an additional advantage, underground detectable tape uses color to communicate the type of buried utility line. Underground detectable tapes conform to the uniform color standard created by the APWA and local bodies for warning tapes.

NON - DETECTABLE WARNING TAPES & TILES

Colour Codes include:

- Yellow for cables, electric power lines, conduit
- Orange for communication, signal lines conduit, alarm
- Yellow for steam, petroleum, gas, oil, gaseous substances
- Grey for Surface Water Network
- Blue for Potable water & Chilled Water
- Green for drain lines and Treated Sewer sewers

IRON & STEEL PIPES & FITTINGS

Flowlines is a leading importer of a wide range Iron & Steel Pipes and associated Fittings such as Bends, Tees, Reducers, Elbows, Nipples etc

Manufacturing Process Type : **Seamless (Smls), ERW, SAW, Forged, Fabricated.**

End Connection Type : **Butt end, Threaded, Flanged, Socket Weld etc.**

Size Range : **1/2" NB to 48" NB**

Schedule : **5s, 10s, 80s, 10, 20, 40, STD, 60, 80, XS, 100, 120, 140, 160 etc.**

Material : **Carbon Steel, Stainless Ws Steel SS304, Stainless Steel SS316, Duplex SS, Galvanized Iron (GI), Malleable Iron (MI) etc.**

Standard : **ASTM A106, ASTM A105, ASTM A234, ASTM A182, ASTM A312, ASTM A403.**

Grade : **304, 304L, 304H, 309S, 309H, 310S, 310H, 316, 316L, 316H, 316Ti, 317, 317L, 321, 321H, 347, 347 H, 904L, ASTM / ASME SA 790 etc. ASTM / ASME A 53 GR. A & B, ASTM A 106 GR. A, B & C. API 5L GR. B, API 5L X 42**

PIPES

FITTINGS

FLANGES

ROUND BARS

OLETS & Other Ancillaries

Standards : **MSS-SP-97, ASME B16.9, ASME B16.11, ASME B16.25, ASME B1.20.1**

Material Grades : **ASTM A105, A181, A182, A350 etc.**

Size Range : **1/2" NB to 24" NB in Sch80, 40, 160, Class 3000, 6000, 9000**

Types of Olets : **Weldolet, Elbolet, Sockolet, Thredolet, Sweepolet, Latrolet, Nipolet**

FASTENERS: HEX BOLTS, NUTS, STUDS BOLTS, THREADED RODS, ANCHOR BOLTS

• Flowlines leads the pack in the supply of all types of fasteners which are widely used in oil & gas, infrastructure, and industrial applications. Made with the highest quality raw materials we supply fasteners according to the customer's specification

- Stainless steel- **SS316, SS316L, SS316 S31, SS304**
- Duplex steel
- alloy steel
- nickel and copper alloy

Our Products ranges

- Bolts, Nuts and Washers
- Round Bars Grade
- Threaded bars/studs
- Anchor Bolts

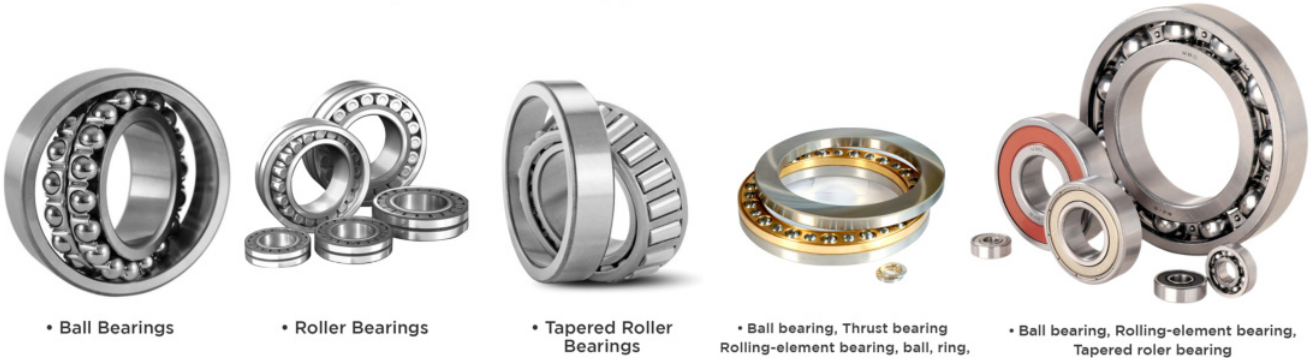

Our products follow international quality standards such as DIN, ANSI, ASTM, BS, EN and ISO and thus have excellent strength, corrosion resistance and durability. We also manufacture custom products in bulk according to the customer's specifications and project requirement

INDUSTRIAL BEARINGS

Flowlines are one of the leading providers of standard and specialized high-quality bearings. In partnership with RKB bearings, a world-leading Swiss bearing manufacturer, we supply standard and specialized bearings to oil & gas, cement, and steel, automotive, manufacturing, power, and petrochemical industries in the GCC. Because of our close partnership with RKB bearings, we can supply high-quality and precise bearings in compliance with customer specifications, requirements, and certifications cost-effectively.

The RKB Bearing Industries Group is a Swiss manufacturing organization established in 1936 that offers reliable and consistent premium class bearings at affordable prices worldwide. RKB has the expertise necessary to develop and produce technological value-added bearings, particularly for the heavy industry where it is recognized by both OEM and MRO customers as a preferential supplier

INDUSTRIAL HOSES AND CONNECTION FITTINGS

To our valued customers in Petrochemical sector, we supply specialized high-quality corrugated braided metal hoses and associated connection fittings. These hoses can be used for wide range of temperatures, pressures and also help to convey numerous chemicals. Due to it's excellent strength and flexibility, they are suitable for critical area in plants

- Corrugated Metal Hoses (Material Grade: SS304/304L, SS316/SS316L)
- Braided Corrugated Metal Hoses (Material Grade: SS304/304L, SS316/SS316L)
- Connection: Flanges ASME/ASTM, Couplings, Camlock (Material Grade: SS304L/316L, Brass, Bronze)
- Other Chemical Hoses for Industrial Purposes (Sewer Jet, Chemical Cleaning etc)
