A photograph of the Golden Gate Bridge in San Francisco, California, taken at sunset. The bridge's towers and suspension cables are silhouetted against a vibrant orange and red sky. The city lights are visible in the background, and the water below is dark and calm. The overall mood is serene and majestic.

About Us

Flowlines is established with a clear purpose of meeting ever-growing requirements in the field of oil & Gas and Infrastructure Sectors. We are spearheaded by a team of dynamic professionals with over fifteen years of experience in sales, marketing, project design, specification, procurement, international logistics, and installation and after-sales. Our purpose is to deliver long-range economic benefits to customers by offering quality products that meet the standards and requirements. Striving for excellence is in our genes and keeping that mantra in mind through every step.

VISION

By holding up the core values of trust, excellence, innovation, and sustainability, we aim to build a progressive and customer-centric company. We value and rely on smart working individuals who can produce innovative results that will uplift us and our stakeholders. With our absolute commitment to the Products and Services, Quality, and Value, we shall set standards in the industry, making us a trusted & reliable partner for our clients. We believe that our continued success is built upon our core values

MISSION

Our business practices and processes are designed to achieve quality and economic results that exceed the expectations of our stakeholders. We deeply believe in collaborating with customers to study and understand their needs to produce world-class solutions from our trusted partners across the globe

ACCESS COVERS IN ALUMINUM AND STEEL

Aluminum and Steel Access Covers are extensively used in areas that require regular and restricted access mainly in Infrastructure and Industrial projects. Aluminum alloy access cover platforms are fabricated out of composite section made of aluminum alloy 6063-T6 which has high tensile strength and excellent corrosion resistance properties. Load carrying capacity suitable for 750 kg./sq.mtr. (7.5 KN/M2). If required by the client higher grade alloy such as 6082 can be proposed.

Available Variants

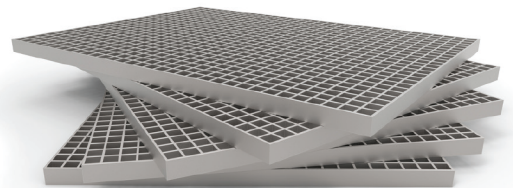

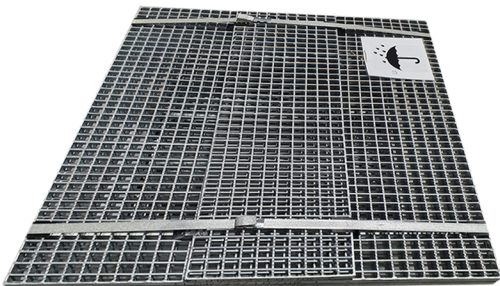

- Type of Cover : **Solid Top or Recessed Types**
- Cover Top Profile : **Serrated or Checker Plate**
- Load class : **Following standards are FATCA and other local specifications 7.5 KN/m2 , 10 KN/m2 etc)**
- Mode of Opening : **Removable Type, Hinged Type with hydraulic lift assist & Sliding type**
- Orientation of Installation : **Floor Type (for underground Chambers & Instruments) and Wall Type (on Vertical Walls)**
- Material Grades : **Aluminium 6063/6082 and Steel Grades S275/SS316/SS304**

Gratings & Access Systems

FLOWLINES is the premier supplier of Gratings & Access Systems to key Oil & Gas, utilities, highways, civil engineering, construction, and Industrial companies

- Floor Gratings are supplied in Mild Steel & SS grades. Special Coating is available in HDG, polyurethane, and epoxy as required for the client.
- Electro forged gratings with twisted crossbar come in standard Mesh Sizes.

FABRICATED PROJECT MATERIALS IN STAINLESS AND HDG STEELS

Flowlines offer range of fabricated Steel materials for the Utility Infrastructure, Oil & Gas, and Industrial projects. Those are designed and manufactured locally as per the client's specific project requirement and approved by local bodies. The main products in this Category include Vent Pipes, Pipe Straps, Pipe Clamps, Extension Spindle for Valves, Wall Brackets for extension Spindles, Valve Operating T-Keys. Fabrication is feasible in various alloys of Steel such as MS, SS316, SS304 and required paint or finish can ensure for final product (HDG, Painting, Epoxy, SS Mill Finish, etc.)
